

Akhil Bharti

Senior Frontend Engineer

akhbharti@gmail.com — +917895061630

Bengaluru, India — github.com/akhilbharti — linkedin.com/in/akhil-bharti

Senior Frontend Engineer with 6+ years of experience building **high-performance web applications** using **React, Next.js, and TypeScript**. Proven expertise in **RESTful/GraphQL API integrations**, optimizing page load speeds by **30%**, and leading **Agile/Scrum** teams. Skilled in **build tools (Webpack, Yarn)** and **micro-frontend architecture**, with a focus on **clean, testable code** (Jest, RTL) and **cross-browser responsive design**.

SKILLS

Programming Languages: HTML, CSS, JavaScript (ES6+), TypeScript, Node.js

Frontend Frameworks/Libraries: React, Next.js, Redux, TypeScript, Tailwind CSS, GraphQL, REST APIs

Tools and Platforms: Webpack, Yarn, Git, Jest, React Testing Library, CI/CD (GitLab, Jenkins), Sentry

Methodologies/Practices: Feature Slice Design, Agile (Scrum), Accessibility (WCAG 2.1 AA), Design Systems, Micro-Frontends, Responsive Design

WORK EXPERIENCE

ServiceNow, Hyderabad — Senior Software Engineer — 11/2023 – 12/2024

- Led the **structured unit testing initiative**, establishing team-wide best practices using **Jest, Chai, and Sinon**. **Increased code coverage by 40%**, improving software quality and maintainability.
- Improved the Reservation Module with Value-Added Services, providing a highly customizable user experience that streamlined service offerings and **boosted operational efficiency**.
- **Architected a Dot Walk Component for GenAI-powered forms** in the User Interface Builder (UIB) visualizing complex data model relationships and field mapping improving form completion rates by **25%**.
- Introduced **WCAG 2.1 AA accessibility compliance** across 5 different applications in WSD Org, enhancing usability for diverse users.
- **Conducted workshops** on ServiceNow's no-code platform Next and component development using Seismic, fostering knowledge sharing and **mentoring team members** to adopt best practices.
- Designed and deployed the Employee Center feature, a unified portal using **React, and Redux**, enhancing user satisfaction, improving self-service resolution rates by 20%, and streamlining the overall HR service experience.

Metamap, Remote — Software Engineer III — 01/2023 – 09/2023

- **Led development** of 15+ reusable components using **Next.js and Atomic Design**, reducing build time by **30%**. Connected **GraphQL APIs with Schema Validations** for real-time KYC data workflows.
- Revamped the legacy codebase using **Feature Slice Design**, improving code structure, reducing bug fixes by **25%**, and **increasing development speed by 30%**.
- Developed a **Copy-Paste boundary feature** for Document Verification tasks, automating form population and reducing agent errors by **33%**.
- Engineered an image filter feature in **React**, improving fraud detection by **27%** through advanced document analysis.
- **Architected a custom event-driven tracking system** in **TypeScript and React**, integrated with **Sentry**, leading to a **35% improvement in performance**.
- Achieved a **35% reduction in TTI and FCP** for the SPA by implementing advanced code-splitting strategies including **lazy-loading, import-on-interaction, and import-on-visibility**; further accelerated deployment by **50%** by replacing heavy dependencies like **Lodash** with lightweight custom polyfills.
- **Collaborated with cross-functional teams** to transform the MAS Admin Panel by developing a, **mobile-first** interface using **React and TypeScript**, and streamlining data interactions with **GraphQL**—resulting in a fully responsive design that boosted user satisfaction by **25%**.
- Managed the development of a ton of components with **NextJS** utilizing **Atomic Design**, increasing the modularity of each component and reducing development time by **30%**.

Draup Inc, Bengaluru, India — Software Developer II — 11/2020 – 01/2023

- Conceptualized and delivered new product features (Projects, Recruitments, Insights), increasing **user satisfaction by 50%** and boosting revenue by **30%**.
- Engineered modular and scalable dashboards using **React, Highcharts, and D3.js**, empowering top enterprises to streamline workforce planning with NLP-powered search, filtering, and interactive visualizations (tree maps, bar charts, geographic maps) for over **132M job profiles**, enhancing dashboard usability and driving a **70% increase in user subscriptions**.
- Boosted document generation speed by **40%** by engineering a reusable **React library integrated with PSPDFKit**.
- Drove performance enhancements by analyzing and profiling production bottlenecks. Realized a **30% faster page response** and **41% efficiency gains** by reducing re-renders, payload sizes, and main-thread blocking.
- **Collaborated with UX team** to establish the **Draup Design System**, integrating **Storybook**, which standardized component development, **reduced onboarding time by 25%**, and sped up feature delivery by **30%**.

Kapture CRM, Bengaluru, India — Software Engineer — 07/2019 – 11/2020

- Led UI modernization for Kapture's analytics suite using **React, Redux, Material-UI, Tailwind CSS**. Developed a customizable dashboard, reducing onboarding by **30%** and boosting user satisfaction by **20%**.
- **Streamlined builds** using **Yarn workspaces** and **Webpack**, reducing CI/CD pipeline times by **25%**.
- **Pioneered micro-frontend architecture** to resolve organizational scaling challenges, increasing release frequency by **40%** and improving cross-team collaboration.

Sunfox Technologies Pvt. Ltd, Dehradun, India — Software Developer — 01/2018 – 06/2019

- Developed a fully functional e-commerce website using **React, Redux, MongoDB, Node.js, and Express**, expanding market reach and driving a **30%** increase in revenue.
- **Led UI development** for a doctor-patient web application using **React, Redux, SASS, and Tailwind**, supporting the **Spandan ECG device** for remote healthcare solutions.
- Pioneered a real-time sales analytics dashboard using **MERN Stack**, optimizing data visualization and enabling stakeholders to make data-driven decisions, resulting in a **30%** decrease in reporting errors.

EDUCATION

Bachelor of Technology in Information Technology

DIT University, Dehradun, India

PUBLICATIONS

PERSONAL PROJECTS

- **React Color Palette**: Created a **React-based tool** to streamline color palette management for designers. Used Material UI and Styled Components to enhance usability and design.
- **React Pokemon Game**: Turn-based Pokemon game built with **React**, showcasing custom JavaScript logic and immersive UI design.
- **Video Streaming Web Application**: Created with **React, Node.js, and REST APIs**, enabling live streaming via RTMP and secure access through **Google OAuth**.
